This guide will provide you with all the information you need to assemble your own AK/AKM pattern rifle. We will cover everything from the basics of the AK platform to the assembly of the various components.

What You Will Need

Before you begin, you will need to gather the following tools and materials:

* An AK/AKM pattern rifle kit * A set of punches * A hammer * A screwdriver
* A torque wrench * Loctite * CLP

Step 1: Prepare The Receiver

The first step is to prepare the receiver. This involves removing the trigger guard and the pistol grip.

To remove the trigger guard, simply use a punch to push out the pin that holds it in place.

To remove the pistol grip, use a screwdriver to remove the screw that holds it in place.

Once the trigger guard and pistol grip have been removed, you can begin to assemble the rifle.

Step 2: Install The Barrel

The next step is to install the barrel. To do this, simply insert the barrel into the receiver and hand-tighten the barrel nut.

Once the barrel nut is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 3: Install The Gas Block

The next step is to install the gas block. To do this, simply slide the gas block onto the barrel and hand-tighten the gas block screws.

Once the gas block screws are hand-tightened, use a torque wrench to tighten them to the proper torque specification.

Step 4: Install The Handguard

The next step is to install the handguard. To do this, simply slide the handguard onto the barrel and hand-tighten the handguard screws.

Once the handguard screws are hand-tightened, use a torque wrench to tighten them to the proper torque specification.

Step 5: Install The Gas Tube

The next step is to install the gas tube. To do this, simply insert the gas tube into the gas block and hand-tighten the gas tube nut.

Once the gas tube nut is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 6: Install The Bolt Carrier Group

The next step is to install the bolt carrier group. To do this, simply insert the bolt carrier group into the receiver and hand-tighten the bolt carrier group screw.

Once the bolt carrier group screw is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 7: Install The Charging Handle

The next step is to install the charging handle. To do this, simply insert the charging handle into the bolt carrier group and hand-tighten the charging handle nut.

Once the charging handle nut is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 8: Install The Trigger

The next step is to install the trigger. To do this, simply insert the trigger into the receiver and hand-tighten the trigger screw.

Once the trigger screw is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 9: Install The Hammer

The next step is to install the hammer. To do this, simply insert the hammer into the receiver and hand-tighten the hammer screw.

Once the hammer screw is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 10: Install The Safety Selector

The next step is to install the safety selector. To do this, simply insert the safety selector into the receiver and hand-tighten the safety selector screw.

Once the safety selector screw is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 11: Install The Buttstock

The next step is to install the buttstock. To do this, simply insert the buttstock into the receiver and hand-tighten the buttstock screw.

Once the buttstock screw is hand-tightened, use a torque wrench to tighten it to the proper torque specification.

Step 12: Install The Magazine

The final step is to install the magazine. To do this, simply insert the magazine into the magazine well.

Once the magazine is inserted, your AK/AKM pattern rifle is now complete.

Assembling an AK/AKM pattern rifle is a relatively simple process. By following the steps outlined in this guide, you can easily build your own rifle.

If you have any questions or concerns, please feel free to contact me. I am always happy to help.
